Experience

Breezy - data-driven property insights for real estate agents <i>Founding Software Engineer (#2 engineer) TypeScript · React Native · NestJS · Terraform · AWS · GCP</i> - Led post-acquisition integration: unified database schemas and platforms into one extensible product - Built AI-powered structured data extraction pipeline, processing 20M+ pages of building code regulations for US-wide insights - Designed and implemented geometrical property analysis algorithms and tooling, integrating multiple data sources - Shipped end-to-end features with product and design; from mobile app to backend services	<i>San Francisco, USA</i> 04/2025 - Present
Fintual (YC S18, Sequoia Capital) <i>Software Engineer @ Onboarding & Recurrence Team TypeScript · React Native · Ruby on Rails</i> - Built automated tax verification pipeline; cut manual processing by 80% (to ~10 min/day) - Reengineered user onboarding with A/B testing; +6 percentage points conversion on 150k-user app - Refactored legacy mobile codebase to TypeScript; fewer runtime errors and clearer ownership of regressions	<i>Remote, Worldwide</i> 04/2024 - 04/2025
Millennium Institute for Foundational Research on Data <i>ML Infra & Privacy Research Scala · Apache Spark & MLlib · Docker · Python</i> - Designed and implemented parallel, privacy-preserving clustering algorithms, achieving 21% higher precision than baseline clustering metrics - Built a ML pipeline (Spark) processing ~1B records, using Apache Spark and MLlib - Built experiment tracking dashboards and tooling; 30% faster model evaluation	<i>Santiago, Chile</i> 12/2022 - 03/2024
Isatec - R&D <i>Software Engineer & Team Lead React · Django · PostgreSQL</i> - Built app-to-server exam pipeline for doctor review; cut sync from 10 min → 1 min per patient ML-powered analysis and tooling; 40K+ records/month, 53% faster review for domain experts - Led team of 8; shipped production tooling with research and design	<i>Santiago, Chile</i> 07/2022 - 08/2023
Premialab <i>Data Science Intern Python · PyTorch · FastAPI · scikit-learn</i> - Trained and backtested momentum models (trees + small NNs) on technical indicators - Built pipeline applying BERT embeddings to 50K+ company descriptions for sector/similarity views in portfolio construction	<i>Paris, France</i> 07/2021 - 12/2021
University of Chile <i>Teaching Assistant</i> Led classes of 100+ students; 95% five star feedback. CS and physics courses	<i>Santiago, Chile</i> 09/2018 - 12/2022

Skills

Programming	Advanced (4+ years): TypeScript, Python · Proficient (1+ years): Ruby, Scala, C++
	Frameworks: React (Native), NestJS, Django, Rails
	Databases & APIs: PostgreSQL, MongoDB, GraphQL
Technologies	Cloud & Infrastructure: AWS, GCP, Docker, Kubernetes, Terraform (OpenTofu)
	Machine Learning: PyTorch, MLlib
Languages	English (C1), French (C1), Spanish (native)

Education

University of Chile <i>BS + MEng in Computer Science - GPA: 3.94 / 4.0 - Rank: 10 / 116 - Summa Cum Laude</i> Software Engineering, Databases, Networks, Operating Systems, Discrete Mathematics	<i>Santiago, Chile</i>
École CentraleSupélec - Paris Saclay University <i>Diplôme d'ingénieur (MSc equivalent) Computer Science Track</i> Distributed Computing, Machine Learning, Advanced Statistics, Optimization	<i>Paris, France</i>

Honors & Awards

2015–2016	National Olympiads: Math: Silver, Bronze. Math Teams: Gold, Gold. Physics: Silver medal	<i>Santiago, Chile</i>
2016	Academic Excellence: Top 1% nationally in university admission test, highest math score regionally	<i>Vallenar, Chile</i>
